**EXPOSURE DRAFT OF PROPOSED**

**Improvements to FRSs**

***Comments to be received by 3 October 2008***

*Improvements to FRSs* (an exposure draft of proposed amendments to Financial Reporting Standards) is issued by the Accounting Standards Council (ASC) for comment only and does not necessarily represent the views of ASC.

Comments should be submitted in writing, so as to be received by **3 October 2008**, preferably by email to: [MOF\\_Feedback\\_ASC@mof.gov.sg](mailto:MOF_Feedback_ASC@mof.gov.sg) or addressed to:

Accounting Standards Council

# PROPOSED FINANCIAL REPORTING STANDARD

ED/FRS

## Improvements to FRSs

### Introduction

---

The Accounting Standards Council (ASC) has published this exposure draft of proposed amendments to Financial Reporting Standards (FRSs) as part of the annual improvements project.

The project provides a streamlined process for dealing efficiently with a collection of non-urgent but necessary amendments to FRSs.

### Structure of exposure draft

---

The exposure draft includes a chapter for each FRS for which an amendment is proposed. Each chapter includes:

- (a) an explanation of the proposed amendment;
- (b) when necessary, any specific additional question unique to that proposed amendment;
- (c) the paragraphs of the FRS or implementation guidance that are affected by the proposed amendment;
- (d) the proposed effective date of each proposed amendment; and
- (e) the basis for its conclusions in proposing the amendment.

Some proposed amendments involve consequential amendments to other FRSs. Those consequential amendments are included in the chapter for the FRS that sets out the proposed amendment.

### Invitation to comment

---

ASC invites comments on the proposed amendments. It would particularly welcome answers to the questions set out below. Comments are most helpful if they:

- (a) answer the question as stated;
- (b) indicate the specific paragraph or paragraphs to which they relate;
- (c) contain a clear rationale;
- (d) describe any alternative it should consider.

Respondents need not comment on all of the questions. ASC is not requesting comments on matters in the FRSs not addressed in the exposure draft.

It will consider all comments received in writing by 3 October 2008. In considering the comments, it

will base its conclusions on the merits of the arguments for and against each alternative, not on the number of responses supporting each alternative.

### **General questions (applicable to all proposed amendments)**

#### **Question 1**

Do you agree with the proposal to amend the FRS as described in the exposure draft? If not, why and what alternative do you propose?

#### **Question 2**

Do you agree with the proposed transition provisions and effective date for the issue as described in the exposure draft? If not, why and what alternative do you propose?

### **Specific question**

#### **Question 3**

It is proposed to include in the Appendix of FRS 18 *Revenue* guidance on determining whether an entity is acting as a principal or as an agent. What indicators, if any, other than those considered should be included in the guidance proposed?

## FRSs addressed

---

The following table shows the topics addressed by these proposed amendments.

| <b>FRS</b>  | <b>Subject of amendment</b>   |
|---|---|
| FRS 102 <i>Share-based Payment</i>  | Scope of FRS 102 and revised FRS 103  |
| FRS 105 <i>Non-current Assets Held for Sale and Discontinued Operations</i> | Disclosures of non-current assets (or disposal groups) classified as held for sale or discontinued operations |
| FRS 108 <i>Operating Segments</i>   | Disclosure of information about segment assets  |
| FRS 7 <i>Statement of Cash Flows</i>  | Classification of expenditures on unrecognised assets   |
| FRS 18 <i>Revenue</i>   | Determining whether an entity is acting as a principal or as an agent   |
| FRS 36 <i>Impairment of Assets</i>  | Unit of accounting for goodwill impairment test   |
| FRS 38 <i>Intangible Assets</i>   | Additional consequential amendments arising from revised FRS 103  |
|   | Measuring the fair value of an intangible asset acquired in a business combination                            |
| FRS 39 <i>Financial Instruments: Recognition and Measurement</i>            | Scope exemption for business combination contracts  |
|   | Application of the fair value option  |
|   | Cash flow hedge accounting  |
|   | Bifurcation of an embedded foreign currency derivative  |

# **Proposed amendment to Financial Reporting Standard 102 *Share-based Payment***

## **Introduction**

---

ASC proposes the following amendment to FRS 102 *Share-based Payment*.

### **Scope of FRS 102 and revised FRS 103**

It proposes to amend paragraph 5 of FRS 102 to confirm that the contribution of a business on formation of a joint venture and common control transactions are not within the scope of FRS 102 even though they do not meet the definition of a business combination in FRS 103 *Business Combinations* (as revised in 2008).

## Proposed amendment to FRS 102 *Share-based Payment*

Paragraphs 5 and 61 are amended (new text is underlined and deleted text is struck through).

### Scope

---

- 5 As noted in paragraph 2, this FRS ... However, an entity shall not apply this FRS to transactions in which the entity acquires goods as part of the net assets acquired in a business combination ~~to which~~ as defined by FRS 103 *Business Combinations* (as revised in 2008) applies, in a combination of entities or businesses under common control as described in paragraphs B1–B4 of FRS 103, or the contribution of a business on the formation of a joint venture as defined by FRS 31 *Interests in Joint Ventures*. Hence, equity instruments issued ... (and therefore within the scope of this FRS).

### Effective date

---

- 61 FRS 103 (as revised in 2008) and *Improvements to FRSs* issued in [date] amended paragraph 5. An entity shall apply those ~~that~~ amendments for annual periods beginning on or after 1 July 2009. If an entity applies FRS 103 (revised 2008) for an earlier period, the amendments shall also be applied for that earlier period.

# **Basis for Conclusions on proposed amendment to FRS 102 *Share-based Payment***

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

## **Scope of FRS 102 and revised FRS 103**

---

- BC1 FRS 103 *Business Combinations* (as revised in 2008) changed the definition of a business combination. The previous definition of a business combination was 'the bringing together of separate entities or businesses into one reporting entity'. The revised definition of a business combination is 'a transaction or other event in which an acquirer obtains control of one or more businesses'.
- BC2 It was advised that the changes to that definition caused the accounting for the contribution of a business in exchange for shares issued on formation of a joint venture by the venturers to be within the scope of FRS 102 *Share-based Payment*. It noted that common control transactions may also be within the scope of FRS 102 depending on which level of the group reporting entity is assessing the combination.
- BC3 It noted that during the development of revised FRS 103 it did not discuss whether it intended FRS 102 to apply to these types of transactions. It also noted that the reason for excluding common control transactions and the accounting by a joint venture upon its formation from the scope of revised FRS 103 was to give more time to consider the relevant accounting issues. When it issued revised FRS 103, it did not intend to change existing practice by bringing such transactions within the scope of FRS 102, which does not specifically address them.
- BC4 Accordingly, it proposes to amend paragraph 5 of FRS 102 to confirm that the contribution of a business on the formation of a joint venture and common control transactions are not within the scope of FRS 102.

# **Proposed amendment to Financial Reporting Standard 105 *Non-current Assets Held for Sale and Discontinued Operations***

## **Introduction**

---

It proposes the following amendment to FRS 105 *Non-current Assets Held for Sale and Discontinued Operations*.

### **Disclosures of non-current assets (or disposal groups) classified as held for sale or discontinued operations**

It proposes to amend FRS 105 to clarify that FRS 105 specifies the disclosures required in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Disclosures in other FRSs do not apply to such assets (or disposal groups) unless those FRSs specifically require disclosures in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations.

## **Proposed amendment to FRS 105 *Non-current Assets Held for Sale and Discontinued Operations***

|                                  |
|----------------------------------|
| Paragraphs 5A and 44D are added. |
|----------------------------------|

### **Scope**

---

- 5A This FRS specifies the disclosures required in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Disclosures in other FRSs do not apply to such assets (or disposal groups) unless those FRSs specifically require disclosures in respect of non-current assets (or disposal groups) classified as held for sale or discontinued operations. Additional disclosures about such assets (or disposal groups) may be necessary to comply with the general requirements of FRS 1.

### **Effective date**

---

- 44D Paragraph 5A was added by *Improvements to FRSs* issued in [date]. An entity shall apply that amendment prospectively for annual periods beginning on or after 1 January 2010. Earlier application is permitted.

# **Basis for Conclusions on proposed amendment to FRS 105 *Non-current Assets Held for Sale and Discontinued Operations***

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

## **Disclosures of non-current assets (or disposal groups) classified as held for sale or discontinued operations**

---

- BC1 It identified a need to clarify the disclosure requirements for non-current assets (or disposal groups) classified as held for sale or discontinued operations in accordance with FRS 105 *Non-current Assets Held for Sale and Discontinued Operations*. Some believe that FRS 105 and other FRSs that specifically refer to non-current assets (or disposal groups) classified as held for sale or discontinued operations set out all the disclosures required in respect of those assets or operations. Others believe that all disclosures required by FRSs whose scope does not specifically exclude non-current assets (or disposal groups) classified as held for sale or discontinued operations apply to such assets (or disposal groups).
- BC2 It noted that paragraph 30 of FRS 105 requires an entity to 'present and disclose information that enables users of the financial statements to evaluate the financial effects of discontinued operations and disposals of non-current assets (or disposal groups).' Paragraph BC17 of the Basis for Conclusions on FRS 105 states that 'it concluded that providing information about assets and groups of assets and liabilities to be disposed of is of benefit to users of financial statements. Such information should assist users in assessing the timing, amount and uncertainty of future cash flows.'
- BC3 It noted that some FRSs other than FRS 105 require specific disclosures for non-current assets (or disposal groups) classified as held for sale or discontinued operations. For instance, paragraph 68 of FRS 33 *Earnings per Share* requires an entity to disclose the amount per share for discontinued operations. It also noted that the requirements of FRS 1 *Presentation of Financial Statements* on fair presentation and materiality also apply to such assets (or disposal groups).
- BC4 It also noted that when a disposal group includes assets and liabilities that are not within the scope of the measurement requirements of FRS 105, disclosures about measurement of those assets and liabilities are normally provided in the other notes to the financial statements and do not need to be repeated, unless they better enable users of the financial statements to evaluate the financial effects of discontinued operations and disposals of non-current assets (or disposal groups).
- BC5 It decided to clarify that FRS 105 and other FRSs that specifically refer to non-current assets (or disposal groups) classified as held for sale or discontinued operations set out all the disclosures required in respect of those assets or operations. Additional disclosures about such assets (or disposal groups) may be necessary to comply with the general requirements of FRS 1.

# **Proposed amendment to Basis for Conclusions on Financial Reporting Standard 108 *Operating Segments***

## **Introduction**

---

It proposes the following amendment to the Basis for Conclusions on FRS 108 *Operating Segments*.

### **Disclosure of information about segment assets**

It decided to amend the Basis for Conclusions accompanying FRS 108 to clarify its view on the disclosure of segment assets. Paragraph BC35 sets out the reasons for its decision to require a measure of segment profit or loss and segment assets to be disclosed regardless of whether those measures are reviewed by the chief operating decision maker. Some have read this paragraph as contradicting long-standing interpretations of SFAS 131 *Disclosures about Segments of an Enterprise and Related Information* published in the US and hence creating an unintended difference from US practice under SFAS 131.

# Proposed amendment to Basis for Conclusions on FRS 108 *Operating Segments*

In the Basis for Conclusions on FRS 108, paragraph BC35 is amended (new text is underlined and deleted text is struck through) and a footnote is added at the end of paragraph BC35. Paragraph BC34 is not proposed for amendment but is included here for ease of reference.

## **Aspects of the management approach**

---

### **Information about segment assets**

- BC34 Several respondents noted that, whilst a measure of segment profit or loss can be expected in every entity's internal reporting, a measure of segment assets is not always available, particularly in service industries or other industries with low utilisation of physical assets. Respondents suggested that in such circumstances a measure of segment assets should be disclosed only if those amounts were regularly provided to the chief operating decision maker.
- BC35 ~~It noted that requiring disclosure of a measure of segment assets only when such a measure is reviewed by the chief operating decision maker would create divergence from SFAS 131. It also supported a minimum disclosure of segment profit or loss and segment assets. It therefore concluded that measures of segment profit or loss and total segment assets should be disclosed for all segments regardless of whether those measures are reviewed by the chief operating decision maker. It noted that paragraph 25 specifies how a segment amount that is required to be disclosed by paragraph 23 should be measured. Paragraph 25 states that 'only those assets and liabilities that are included in the measure of the segment's assets and segment's liabilities that are used by the chief operating decision maker shall be reported for that segment.'~~ The measure for total segment assets would be nil when such information is not provided to the chief operating decision maker. Therefore, making no disclosure of segment assets would be in accordance with the FRS in some cases. It also noted that the usefulness of segment asset disclosures in those situations would not be sufficient to justify the additional resources needed to track assets by segment for reporting purposes only.\*

\* After FRS 108 was issued it was informed that the reasons originally set out in paragraph BC35 contradict long-standing interpretations published in the US for the application of SFAS 131 and create an unintended difference from practice in the US under SFAS 131. After reconsideration and discussion of the interaction between the disclosure and measurement requirements in the FRS (paragraphs 23 and 25), it concluded that those reasons no longer reflected its thinking. It therefore amended paragraph BC35 by *Improvements to FRSs* issued in [date]. That conclusion is consistent with the wording of the FRS and therefore no changes were made to the FRS.

# **Basis for Conclusions on proposed amendment to Basis for Conclusions on FRS 108 *Operating Segments***

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

## **Disclosures of information about segment assets**

---

- BC1 The Basis for Conclusions on FRS 108 *Operating Segments* (paragraph BC35) sets out the reasons for its decision to require a measure of segment profit or loss and segment assets to be disclosed regardless of whether those measures are reviewed by the chief operating decision maker. When it made this decision, it thought that this requirement would converge with US GAAP. However, after FRS 108 was issued, it was made aware that such a requirement contradicts long-standing interpretations published in the US for the application of SFAS 131 and creates an unintended difference from practice in the US under SFAS 131.
- BC2 It reconsidered the reasons set out in paragraph BC35, and discussed the interaction between the disclosure and measurement requirements in the FRS (paragraphs 23 and 25). In some industries with a low base of physical assets, a measure of segment assets is not always available or expected. It noted that there could be cases when making no disclosure of segment assets would be in accordance with the FRS. In addition, it concluded that the usefulness of segment asset disclosures for those industries would not be sufficient to justify the additional resources needed to track assets by segment solely for reporting purposes.
- BC3 It noted that the conclusions in paragraph BC2 above are consistent with the wording of the FRS and therefore decided that no changes should be made to the FRS. It further noted that paragraph BC35 as originally drafted no longer reflected its thinking. Therefore, it decided to amend paragraph BC35.

# **Proposed amendment to Financial Reporting Standard 107 *Statement of Cash Flows***

## **Introduction**

---

It proposes the following amendment to FRS 7 *Statement of Cash Flows*.

### **Classification of expenditures on unrecognised assets**

In 2008 it was reported that practices differ for the classification of cash flows for expenditures incurred with the objective of generating future cash flows when those expenditures are not recognised as assets in accordance with FRSs. Some entities classify such expenditures as cash flows from operating activities and others classify them as investing activities.

It proposes to amend FRS 7 to state explicitly that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activities.

## Proposed amendment to FRS 7 *Statement of Cash Flows*

Paragraph 16 is amended (new text is underlined and deleted text is struck through) and paragraph 56 is added. Paragraph 6 is not proposed for amendment but is included here for ease of reference.

### Definitions

---

6 The following terms are used in this Standard with the meanings specified:

...

*Operating activities* are the principal revenue-producing activities of the entity and other activities that are not investing or financing activities.

*Investing activities* are the acquisition and disposal of long-term assets and other investments not included in cash equivalents.

*Financing activities* are activities that result in changes in the size and composition of the contributed equity and borrowings of the entity.

### Presentation of a statement of cash flows

---

#### Investing activities

16 The separate disclosure of cash flows arising from investing activities is important because the cash flows represent the extent to which expenditures have been made for resources intended to generate future income and cash flows that are initially recognised as assets in the statement of financial position. Examples of cash flows arising from investing activities are:

(a) ...

### Effective date

---

56 Paragraph 16 was amended by *Improvements to FRSs* issued in [date]. An entity shall apply that amendment for annual periods beginning on or after 1 January 2010. Earlier application is permitted. If an entity applies the amendment for an earlier period it shall disclose that fact.

## **Appendix to proposed amendment to FRS 7**

### **Proposed amendment to Basis for Conclusions on FRS 106 *Exploration for and Evaluation of Mineral Resources***

|   |
|---|
| In the Basis for Conclusions on FRS 106, paragraphs BC23A and BC23B are added. Paragraph BC23 is not proposed for amendment but is included here for ease of reference. |
|---|

#### **Temporary exemption from FRS 8 paragraphs 11 and 12**

BC23 It acknowledges that it is difficult to make piecemeal changes to recognition and measurement practices at this time because many aspects of accounting for extractive activities are interrelated with aspects that will not be considered until it completes its comprehensive review of accounting for extractive activities. However, not imposing the requirements in the FRS would detract from the relevance and reliability of an entity's financial statements to an unacceptable degree.

BC23A In 2008, as part of its annual improvements project, it considered the guidance on the treatment in FRS 7 *Statement of Cash Flows* of some types of expenditures incurred with the objective of generating future cash flows when those expenditures are not recognised as assets under FRSs. Some entities classify such expenditures as cash flows from operating activities and others classify them as investing activities. Examples of such expenditures are those for exploration and evaluation activities, which can be recognised according to FRS 106 as either an asset or an expense.

BC23B It noted that the exemption in FRS 106 applies only to recognition and measurement of exploration and evaluation assets, not to the classification of related expenditures in the statement of cash flows. Consequently, it proposed an amendment to paragraph 16 of FRS 7 to state that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activities.

# Basis for Conclusions on proposed amendment to FRS 7 *Statement of Cash Flows*

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

## **Classification of expenditures on unrecognised assets**

---

- BC1 This Basis for Conclusions summarises its considerations in reaching its conclusions in proposing an amendment to FRS 7 *Statement of Cash Flows* in 2008.
- BC2 In 2008 it was reported that the practices differ for the classification of cash flows for expenditures incurred with the objective of generating future cash flows when those expenditures are not recognised as assets in accordance with FRSs. Some entities classify such expenditures as cash flows from operating activities and others classify them as investing activities. Examples of such expenditures are those for exploration and evaluation activities, which FRS 106 *Exploration for and Evaluation of Mineral Resources* permits to be recognised as either an asset or an expense depending on the entity's previous accounting policies for those expenditures. Expenditures on advertising and promotional activities, staff training, and research and development could also raise the same issue.
- BC3 It decided not to add this issue to its agenda but recommended that it amend FRS 7 to state explicitly that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activity.
- BC4 In 2008, as part of its annual improvements project, it considered the principles in FRS 7, specifically guidance on the treatment of such expenditures in the statement of cash flows. It noted that even though paragraphs 14 and 16 of FRS 7 appear to be clear that only expenditure that results in the recognition of an asset should be classified as cash flows from investing activities, the wording is not definitive in this respect. Some might misinterpret the reference in paragraph 11 of FRS 7 for an entity to assess classification by activity that is most appropriate to its business to imply that the assessment is an accounting policy choice.
- BC5 Consequently, it decided to remove the potential misinterpretation by proposing an amendment to paragraph 16 of FRS 7 to state explicitly that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activities.
- BC6 It concluded that this proposal, if confirmed, would better align the classification of cash flows from investing activities in the statement of cash flows and the presentation of recognised assets in the statement of financial position, would reduce divergence in practice and, therefore, would result in financial statements that are easier for users to understand.
- BC7 It also concluded that the Basis for Conclusions accompanying FRS 106 should be amended to clarify its view that the exemption in FRS 106 applies only to recognition and measurement of exploration and evaluation assets, not to the classification of related expenditures in the statement of cash flows, for the same reasons set out above in paragraph BC6.

# **Proposed amendment to Appendix of Financial Reporting Standard 18 *Revenue***

## **Introduction**

---

It proposes the following amendment to the Appendix of FRS 18 *Revenue*.

### **Determining whether an entity is acting as a principal or as an agent**

It proposes to amend the guidance accompanying FRS 18 to address the issue of determining whether an entity is acting as a principal or as an agent. Paragraph 8 of FRS 18 specifies the accounting for amounts collected on behalf of a principal. However, FRS 18 does not provide guidance on determining whether an entity is acting as a principal or as an agent.

## Proposed amendment to Appendix of FRS 18 Revenue

In the Appendix of FRS 18, after example 20, a heading, a footnote and example 21 are added.

### Recognition and measurement

---

#### 21 *Determining whether an entity is acting as a principal or as an agent (2008 amendment)\**

\* In 2007 it was recommended that it includes in this Appendix guidance on determining whether an entity is acting as a principal or as an agent in accordance with FRS 18. It noted that this issue has widespread and practical relevance. It noted that paragraph 8 of FRS 18 specifies the accounting for amounts collected on behalf of a principal. However, it acknowledged that FRS 18 does not provide guidance on determining whether an entity is acting as a principal or as an agent. Example 21 was added by *Improvements to FRSs* issued in [date].

Paragraph 8 states that 'in an agency relationship, the gross inflows of economic benefits include amounts collected on behalf of the principal and which do not result in increases in equity for the entity. The amounts collected on behalf of the principal are not revenue. Instead, revenue is the amount of commission.' Determining whether an entity is acting as a principal or as an agent depends on facts and circumstances and requires judgement. An entity is acting as a principal when it has exposure to the significant risks and rewards associated with the sale of goods or the rendering of services. Features that, individually or in combination, indicate that an entity is acting as a principal include:

- (a) the entity has the primary responsibility for providing the goods or services to the customer or for fulfilling the order, for example by being responsible for the acceptability of the products or services ordered or purchased by the customer;
- (b) the entity has inventory risk before or after the customer order, during shipping or on return;
- (c) the entity has discretion in establishing prices, either directly or indirectly, for example by providing additional goods or services;
- (d) the entity bears the customer's credit risk.

An entity is acting as an agent when it does not have exposure to the significant risks and rewards associated with the sale of goods or the rendering of services. One feature indicating that an entity is acting as an agent is that the amount the entity earns is predetermined, being either a fixed fee per transaction or a stated percentage of the amount billed to the customer.

## **Basis for Conclusions on proposed amendment to Appendix of FRS 18 Revenue**

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

### **Determining whether an entity is acting as a principal or as an agent**

---

- BC1 In 2007 it received a request for guidance on determining whether an entity is acting as a principal or as an agent in accordance with FRS 18. Noting that this issue has widespread and practical relevance, it was recommended that it includes such guidance in the Appendix of FRS 18 as a part of its annual improvements project.
- BC2 It noted that paragraph 8 of FRS 18 specifies the accounting for amounts collected on behalf of a principal. However, it acknowledged that FRS 18 does not provide guidance on how to determine whether an entity is acting as a principal or as an agent.
- BC3 It concluded that an entity is acting as a principal when it has exposure to the significant risks and rewards associated with the sale of goods or the rendering of services. It identified some features that, individually or in combination, indicate that this criterion is met. It concluded that an entity is acting as an agent when it does not have exposure to the significant risks and rewards associated with the sale of goods or the rendering of services.

# **Proposed amendment to Financial Reporting Standard 36 *Impairment of Assets***

## **Introduction**

---

It proposes the following amendment to FRS 36 *Impairment of Assets*.

### **Unit of accounting for goodwill impairment**

It proposes to amend FRS 36 to clarify whether the largest unit permitted by FRS 36 is the operating segment level as defined in paragraph 5 of FRS 108 *Operating Segments* before or after the aggregation permitted by paragraph 12 of FRS 108.

## Proposed amendment to FRS 36 *Impairment of Assets*

Paragraph 80 is amended (new text is underlined and deleted text is struck through) and paragraph 140E is added.

### Cash-generating units and goodwill

---

#### Recoverable amount and carrying amount of a cash-generating unit

#### Goodwill

*Allocating goodwill to cash-generating units*

- 80 For the purpose of impairment testing, goodwill acquired in a business combination shall, from the acquisition date, be allocated to each of the acquirer's cash-generating units, or groups of cash-generating units, that is expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. Each unit or group of units to which the goodwill is so allocated shall:
- (a) represent the lowest level within the entity at which the goodwill is monitored for internal management purposes; and
  - (b) not be larger than an operating segment ~~determined in accordance with~~ as defined by paragraph 5 of FRS 108 *Operating Segments* before aggregation.

### Transitional provisions and effective date

---

- 140E *Improvements to FRSs* issued [date] amended paragraph 80(b). An entity shall apply that amendment prospectively for annual periods beginning on or after 1 January 2010. Earlier application is permitted. If an entity applies the amendment for an earlier period it shall disclose that fact.

# **Basis for Conclusions on proposed amendment to FRS 36 *Impairment of Assets***

*This Basis for Conclusions accompanies, but is not part of, the proposed amendment.*

## **Unit of accounting for goodwill impairment**

---

- BC1 Entities adopting FRS 108 must reconsider the allocation of goodwill to cash-generating units because of the definition of operating segment introduced by FRS 108. That definition affects the determination of the largest unit permitted by paragraph 80 for testing goodwill for impairment. In 2008 it was made aware that divergent views had developed regarding the largest unit permitted by FRS 36 for impairment testing of goodwill. One view is that the unit is the operating segment level as defined in paragraph 5 of FRS 108 before the aggregation permitted by paragraph 12 of FRS 108. The other view is that the unit is the operating segment level as defined in paragraph 5 of FRS 108 after the aggregation permitted by paragraph 12 of FRS 108.
- BC2 It noted that the lowest level of the entity at which management monitors goodwill as required in paragraph 80(a) is the same as the lowest level of operating segments at which the chief operating decision maker regularly reviews operating results as defined in FRS 108. It also noted that the linkage of the entity's goodwill monitoring level with the entity's internal reporting level is intentional, as previously described in paragraph BC140 of FRS 36.
- BC3 It noted that aggregating operating segments for goodwill impairment testing into a unit larger than the level at which goodwill is monitored contradicts the rationale underlying FRS 36, as set out in paragraphs BC145–BC150 of FRS 36. In addition, meeting the aggregation criteria of similar economic characteristics permitted in FRS 108 does not automatically result in groups of cash-generating units that are expected to benefit from the synergies of allocated goodwill. Similarly, the aggregated segments do not necessarily represent business operations that are economically interdependent or work in concert to recover the goodwill being assessed for impairment.
- BC4 Therefore, it decided to propose an amendment to paragraph 80(b) to state that the required unit for goodwill impairment in this standard is not larger than the operating segment level as defined in paragraph 5 of FRS 108 before the permitted aggregation.

# Proposed amendments to Financial Reporting Standard 38 *Intangible Assets*

## Introduction

---

it proposes the following amendments to FRS 38 *Intangible Assets*.

### **Additional consequential amendments arising from revised FRS 103**

It proposes additional amendments to paragraphs 36 and 37 of FRS 38 to clarify the effect of its decisions in FRS 103 *Business Combinations* (as revised in 2008) on the accounting for intangible assets acquired in a business combination.

### **Measuring the fair value of an intangible asset acquired in a business combination**

It also proposes to clarify the description of valuation techniques commonly used by entities when measuring the fair value of intangible assets acquired in a business combination that are not traded in active markets.

# Proposed amendments to FRS 38 *Intangible Assets*

Paragraphs 36, 37, 40, 41 and 130C are amended (new text is underlined and deleted text is struck through) and paragraph 130E is added.

## Recognition and measurement

### Acquisition as part of a business combination

#### Measuring the fair value of an intangible asset acquired in a business combination

- 36 An intangible asset acquired in a business combination might be separable, but only together with a related contract, identifiable tangible or intangible asset, or liability. ~~For example, a magazine's publishing title might not be able to be sold separately from a related subscriber database, or a trademark for natural spring water might relate to a particular spring and could not be sold separately from the spring.~~ In such cases, the acquirer recognises the intangible group of assets as a single asset separately from goodwill if the individual fair values of the assets in the group are not reliably measurable. If an intangible asset is separable only with another intangible asset, the acquirer may recognise the group of intangible assets as a single asset.
- 37 Similarly, the terms 'brand' and 'brand name' are often used as synonyms for trademarks and other marks. ~~However, the former are general marketing terms that are typically used to refer to a group of complementary assets such as a trademark (or service mark) and its related trade name, formulas, recipes and technological expertise. The acquirer may recognise as a single asset a group of complementary intangible assets comprising a brand if the individual fair values of the complementary assets are not reliably measurable. If the individual fair values of the complementary assets are reliably measurable, an acquirer may recognise them as a single asset provided the individual assets have similar useful lives. For example, the terms 'brand' and 'brand name' are often used as synonyms for trademarks and other marks. However, the former are general marketing terms that are typically used to refer to a group of complementary assets such as a trademark (or service mark) and its related trade name, formulas, recipes and technological expertise.~~
- 40 If no active market exists for an intangible asset, its fair value is the amount that the entity would have paid for the asset, at the acquisition date, in an arm's length transaction between knowledgeable and willing parties, on the basis of the best information available. In determining this amount, an entity considers the outcome of recent transactions for similar assets. For example, an entity may apply multiples reflecting current market transactions to factors that drive the profitability of the asset (such as revenue and operating profit).
- 41 Entities that are ~~regularly~~ involved in the purchase and sale of ~~unique~~ intangible assets may have developed techniques for estimating their fair values indirectly. These techniques may be used for initial measurement of an intangible asset acquired in a business combination if their objective is to estimate fair value and if they reflect current transactions and practices in the industry to which the asset belongs. These techniques include, for example ~~when~~ appropriate:
- (a) ~~applying multiples reflecting current market transactions to indicators that drive the profitability of the asset (such as revenue, market shares and operating profit) or to the royalty stream that could be obtained from licensing the intangible asset to~~ estimating the hypothetical costs the entity avoids by owning the intangible asset and not needing:
- (i) to license it from another party in an arm's length transaction (as in the 'relief from royalty' approach) or

- (ii) to recreate or replace it (as in the cost approach); ~~or and~~
- (b) discounting estimated future net cash flows from the asset.

## **Transitional provisions and effective date**

---

- 130C FRS 103 (as revised in 2008) amended paragraphs 12, 33–35, 68, 69, 94 and 130, deleted paragraphs 38 and 129 and added paragraph 115A. Improvements to FRSs, issued in [date], amended paragraphs 36 and 37. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 July 2009. Therefore, amounts recognised for intangible assets and goodwill in prior business combinations shall not be adjusted. If an entity applies FRS 103 (revised 2008) for an earlier period, the amendments shall also be applied for that earlier period.
- 130E *Improvements to FRSs*, issued in [date], amended paragraphs 40 and 41. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 January 2010. Earlier application is permitted. If an entity applies the amendments for an earlier period it shall disclose that fact.

## **Basis for Conclusions on proposed amendments to FRS 38 *Intangible Assets***

*This Basis for Conclusions accompanies, but is not part of, the proposed amendments.*

### **Additional consequential amendments arising from revised FRS 103**

---

- BC1 When it developed FRS 103 *Business Combinations* (as revised in 2008), it decided that if an intangible asset acquired in a business combination is separable or arises from contractual or other legal rights, sufficient information exists to measure the fair value of the asset reliably. It made related amendments to FRS 38 to reflect that decision. However, it has identified additional amendments to paragraphs 36 and 37 of FRS 38 that are needed to reflect clearly its decisions on the accounting for intangible assets acquired in a business combination. Those amendments would be effective at the same time as FRS 103.

### **Measuring the fair value of an intangible asset acquired in a business combination**

---

- BC2 It was made aware that paragraph 41 of FRS 38 could be misinterpreted in practice and could lead entities to measure fair value inappropriately. To address this, it decided to amend paragraphs 40 and 41 of FRS 38 to clarify the description of valuation techniques commonly used to measure intangible assets at fair value when assets are not traded in an active market. It also decided that the amendments should be applied prospectively because retrospective application might require some entities to remeasure fair values associated with previous transactions. It does not think this is appropriate because the remeasurement might involve the use of hindsight in those circumstances.

# Proposed amendments to Financial Reporting Standard 39 *Financial Instruments: Recognition and Measurement*

## Introduction

---

It proposes the following amendments to FRS 39 *Financial Instruments: Recognition and Measurement*.

### **Scope exemption of business combination contracts**

It proposes to clarify that the scope exemption in paragraph 2(g) applies only to binding (forward) contracts between an acquirer and a vendor in a business combination to buy an acquiree at a future date.

### **Application of the fair value option**

It proposes to clarify that the fair value option in paragraph 11A applies only to financial instruments within the scope of FRS 39 that contain embedded derivatives.

### **Cash flow hedge accounting**

It proposes to clarify when gains and losses on hedging instruments should be reclassified from equity to profit or loss as a reclassification adjustment (see FRS 1 *Presentation of Financial Statements* (as revised in 2008)) for cash flow hedges of a forecast transaction that subsequently results in the recognition of a financial instrument or for cash flow hedges of recognised financial instruments. The proposed amendments clarify that the gains or losses on the hedging instrument should be reclassified from equity to profit or loss as a reclassification adjustment in the period that the hedged forecast cash flows affect profit or loss.

### **Bifurcation of an embedded foreign currency derivative**

It proposes to clarify what the 'economic environment' is in determining whether a currency is commonly used in contracts to buy or sell non-financial items and therefore is closely related to the host contract. The proposed amendment clarifies that contracts denominated in foreign currencies that have one or more of the characteristics of a functional currency (as set out in FRS 21 *The Effect of Changes in Foreign Exchange Rates*) are likely to be integral to the contractual arrangement and therefore closely related to the host contract and prohibited from being accounted for separately.

# Proposed amendments to FRS 39 *Financial Instruments: Recognition and Measurement*

Paragraphs 2(g), 11A, 97 and 100 are amended (new text is underlined and deleted text is struck through) and paragraph 103H is added.

## Scope

---

- 2 This Standard shall be applied by all entities to all types of financial instruments except:
- (a) ...
  - (g) any forward contracts that results from an agreement entered into before the acquisition date (ie before the date on which the acquirer obtains control of the acquiree) between an acquirer and a vendor, in a business combination, to buy or sell an acquiree at a future date and at a specified price (or on a specified price basis).
  - (h) ...

## Embedded derivatives

---

- 11A Notwithstanding paragraph 11, if a financial instrument contract within the scope of this Standard contains one or more embedded derivatives, an entity may designate the entire hybrid (combined) financial instrument contract as a financial asset or financial liability at fair value through profit or loss unless:
- (a) ...

## Hedging

---

### Hedge accounting

#### Cash flow hedges

- 97 If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gains or losses that were recognised in other comprehensive income in accordance with paragraph 95 shall be reclassified from equity to profit or loss as a reclassification adjustment (see FRS 1 (as revised in 2008)) in the same period or periods during which the hedged forecast cash flows ~~asset acquired or liability assumed~~ affects profit or loss (such as in the periods that interest income or interest expense is recognised). However, if an entity expects that all or a portion of a loss recognised in other comprehensive income will not be recovered in one or more future periods, it shall reclassify into profit or loss as a reclassification adjustment the amount that is not expected to be recovered.
- 100 For cash flow hedges other than those covered by paragraphs 97 and 98, amounts that had been recognised in other comprehensive income shall be reclassified from equity to profit or loss as a reclassification adjustment (see FRS 1 (revised 2008)) in the same period or periods during which the hedged forecast cash flows ~~transaction~~ affects profit or loss (for example, when a forecast sale occurs).

## Effective date and transition

---

103H *Improvements to FRSs* issued in [date] amended paragraphs 2(g), 11A, 97, 100 and AG33(d). An entity shall apply those amendments prospectively for annual periods beginning on or after 1 January 2010. Earlier application is permitted. If an entity applies the amendments for an earlier period it shall disclose that fact.

|   |
|---|
| In Appendix A <i>Application guidance</i> , paragraph AG33(d) is amended (new text is underlined and deleted text is struck through). |
|---|

## Embedded derivatives (paragraphs 10–13)

---

AG33 The economic characteristics and risks of an embedded derivative are closely related to the economic characteristics and risks of the host contract in the following examples. In these examples, an entity does not account for the embedded derivative separately from the host contract.

...

- (d) An embedded foreign currency derivative in a host contract that is an insurance contract or not a financial instrument ~~(such as a contract for the purchase or sale of a non-financial item where the price is denominated in a foreign currency)~~ is integral to the arrangement and hence is closely related to the host contract provided it is not leveraged, does not contain an option feature, and requires payments denominated in one of the following currencies:
- (i) the functional currency of any substantial party to that contract;
  - (ii) the currency in which the price of the related good or service that is acquired or delivered is routinely denominated in commercial transactions around the world (such as the US dollar for crude oil transactions); or
  - (iii) a currency that has one or more of the characteristics of a functional currency, as set out in paragraph 9 of FRS 21, of a substantial party to the contract is commonly used in contracts to purchase or sell non-financial items in the economic environment in which the transaction takes place (eg a relatively stable and liquid currency that is commonly used in local business transactions or external trade).

## **Proposed amendment to guidance on implementing FRS 39 *Financial Instruments: Recognition and Measurement***

The answer to Question F.6.2 is amended (new text is underlined and deleted text is struck through).

### **F.6.2 Hedge accounting considerations when interest rate risk is managed on a net basis**

**Issue (j) – For cash flow hedges, if a derivative is used to manage a net exposure to interest rate risk and the derivative is designated as a cash flow hedge of forecast interest cash flows or portions of them on a gross basis, does the occurrence of the hedged forecast transaction give rise to an asset or liability that will result in a portion of the hedging gains and losses that were recognised in other comprehensive income remaining in equity?**

No. In the hedging relationship described in Issue (c) above, the hedged item is a group of forecast transactions consisting of interest cash flows in specified future periods. The hedged forecast transactions do not result in the recognition of assets or liabilities and the effect of interest rate changes that are designated as being hedged is recognised in profit or loss in the period in which the forecast transactions occur. Although this is not relevant for the types of hedges described here, if instead the derivative is designated as a hedge of a forecast purchase of a financial asset or issue of a financial liability, the associated gains or losses that were recognised in other comprehensive income are reclassified from equity to profit or loss in the same period or periods during which the ~~asset acquired or liability incurred~~ hedged forecast cash flows affects profit or loss (such as in the periods that interest expenses are recognised). However, if an entity expects at any time that all or a portion of a net loss recognised in other comprehensive income will not be recovered in one or more future periods, it shall reclassify immediately from equity to profit or loss the amount that is not expected to be recovered.

## **Basis for Conclusions on proposed amendments to FRS 39 *Financial Instruments: Recognition and Measurement***

---

*This Basis for Conclusions accompanies, but is not part of, the proposed amendments.*

### **Scope exemption of business combination contracts**

---

- BC1 It was advised that there was diversity in practice regarding the application of the exemption in paragraph 2(g) of FRS 39. Paragraph 2(g) applies to particular contracts arising from a business combination and results in those contracts not being accounted for as derivatives while, for example, necessary regulatory and legal processes are being completed.
- BC2 Business combinations can be structured either as an acquisition of the net assets of an entity or as a purchase of controlling equity interests in the acquiree. The purpose of paragraph 2(g) is to ensure that the structure of an acquisition does not result in different accounting for the acquisition.
- BC3 It decided that paragraph 2(g) should be restricted to forward financial instrument contracts between an acquirer and a vendor in a business combination to buy or sell an acquiree at a future date and should not apply to currently exercisable option contracts that on exercise will result in control over an entity. This is because such option contracts are excluded from the scope of FRS 39 by paragraph 2(a).
- BC4 FRS 27 *Consolidated and Separate Financial Statements* (as amended in 2008) states that non-currently exercisable potential voting rights are not considered in determining control. As such, non-currently exercisable option contracts would not meet the definition of a business combination in FRS 103.
- BC5 Paragraph 2(g) refers specifically to contracts between an acquirer and a vendor in a business combination to buy or sell an acquiree at a future date. Hence, it decided that the exemption in paragraph 2(g) should also not be applied to non-currently exercisable option contracts.
- BC6 The concern that the structure of a business combination transaction may result in different accounting treatments without the exemption in paragraph 2(g) does not arise in the case of investments in associates because an investment in an associate does not represent an acquisition of the constituent assets of the investee. Hence, it concluded that paragraph 2(g) should not be applied by analogy to investments in associates and similar transactions.

### **Application of the fair value option**

---

- BC7 It was advised that there was diversity in practice regarding the application of the paragraph 11A of FRS 39, in particular whether the fair value option available in paragraph 11A can be applied to all contractual arrangements with embedded derivatives including those that contain host contracts outside the scope of FRS 39. It acknowledged that the wording of paragraph 11A was not clear.
- BC8 During the development of the fair value option, it discussed the fair value option only in the context of financial instruments within the scope of FRS 39. Until *The Fair Value Option* was issued in June 2005 the option was restricted to financial assets and financial liabilities within the scope of the Standard. In amending the option, it did not intend to expand the class of assets and liabilities to which the option could be applied. The objective was to restrict an entity's ability to designate financial instruments as at fair value through profit or loss compared with the previously unrestricted version and not to widen the scope of the option to contracts not within the scope of FRS 39.
- BC9 Accordingly, it decided to eliminate the diversity in practice by specifying that the fair value

option in paragraph 11A applies only to financial instruments with embedded derivatives within the scope of FRS 39 (as was originally intended by ASC).

## **Cash flow hedge accounting**

---

BC10 If a hedged forecast transaction results in the recognition of a financial asset or a financial liability, paragraph 97 of FRS 39 requires the associated gains or losses on hedging instruments to be reclassified from equity to profit or loss as a reclassification adjustment in the same period or periods during which the hedged item affects profit or loss (such as in the periods that interest income or interest expense is recognised).

BC11 It was informed that there was uncertainty about how paragraph 97 should be applied when the designated cash flow exposure being hedged differs from the financial instrument arising from the hedged forecast cash flows.

BC12 The example below illustrates the issue:

An entity applies the guidance in the answer to Question F.6.3 of the guidance on implementing FRS 39. On 1 January 20X0 the entity designates forecast cash flows for the risk of variability arising from changes in interest rates. Those forecast cash flows arise from the repricing of existing financial instruments and are scheduled for 1 April 20X0. The entity is exposed to variability in cash flows for the three-month period beginning on 1 April 20X0 due to changes in interest rate risk that occur from 1 January 20X0 to 31 March 20X0.

The occurrence of the forecast cash flows is deemed to be highly probable and all the other relevant hedge accounting criteria are met. The financial instrument that results from the hedged forecast cash flows is a five-year interest-bearing instrument.

BC13 Paragraph 97 requires the gains or losses on the hedging instrument to be reclassified from equity to profit or loss as a reclassification adjustment in the same period or periods during which the asset acquired or liability assumed affects profit or loss. The financial instrument that was recognised is a five-year instrument that will affect profit or loss for five years. The wording in paragraph 97 suggests that the gains or losses should be reclassified over five years, even though the cash flows designated as the hedged item were hedged for the effects of interest rate changes over only a three-month period.

BC14 It believes that the wording of paragraph 97 does not reflect the underlying rationale in hedge accounting, ie that the gains or losses on the hedging instrument should offset the gains or losses on the hedged item, and the offset should be reflected in profit or loss by way of reclassification adjustments.

BC15 It believes that in the example set out above the gains or losses should be reclassified over a period of three months beginning on 1 April 20X0, and not over a period of five years beginning on 1 April 20X0.

BC16 It decided to amend paragraph 97 of FRS 39 to clarify that the gains or losses on the hedged instrument should be reclassified from equity to profit or loss during the period that the hedged forecast cash flows affect profit or loss. It also decided that to avoid similar confusion paragraph 100 of FRS 39 should be amended to be consistent with paragraph 97.

## **Bifurcation of an embedded foreign currency derivative**

---

BC17 It was advised that there was diversity in practice regarding the application of paragraph AG33(d), in particular what the 'economic environment' is in determining whether a currency is commonly used in contracts to buy or sell non-financial items.

BC18 Paragraph AG33(d) is intended to prohibit the separation of embedded foreign currency derivatives if they are integral to the contractual arrangement, ie they have been entered into for reasons that are clearly not based on achieving a desired accounting result or for

speculative purposes.

BC19 It believes that contracts denominated in the following foreign currencies are likely to be integral to the contractual arrangement:

- (a) the functional currency of any substantial party to that contract
- (b) the currency in which the price of the related good or service that is acquired or delivered is routinely denominated in commercial transactions around the world (such as the US dollar for crude oil transactions)
- (c) a local currency of any substantial party to that contract
- (d) a liquid international currency used by parties domiciled in small countries, as a convenient means of exchange
- (e) a hard currency used by an entity operating in a hyperinflationary economy to protect against inflation
- (f) a foreign currency commonly used in local business transactions— for example, when monetary amounts are viewed by the general population not in terms of the local currency but in terms of another related currency.

BC20 It noted that these currencies have one or more of the characteristics of a functional currency as set out in paragraph 9 of FRS 21 *The Effects of Changes in Foreign Exchange Rates*.

BC21 Accordingly, it decided to amend paragraph AG33(d) to refer to the characteristics of a functional currency.
